# **26**

# **Numbers and Interrogatives**

You will be able to—

- 1. recognize and translate interrogative statements,
- 2. recognize and translate indefinite pronouns,
- 3. recognize and translate basic Greek numbers,
- 4. gain more practice in translating and working with Greek, and
- 5. master ten more high-frequency vocabulary words.

#### Introduction

Thus far we have looked at the following types of pronouns: personal (e.g.,  $\dot{\epsilon}\gamma\dot{\omega}$ ), relative (e.g.,  $\delta\varsigma$ ), demonstrative (e.g.,  $o\tilde{\upsilon}\tau o\varsigma$ ), reflexive (myself [ $\dot{\epsilon}\mu\alpha\upsilon\tau o\tilde{\upsilon}$ ], yourself [ $\sigma\epsilon\alpha\upsilon\tau o\tilde{\upsilon}$ ], him/her/itself [ $\dot{\epsilon}\alpha\upsilon\tau o\tilde{\upsilon}$ ]) and reciprocal (e.g.,  $\dot{\alpha}\lambda\lambda\dot{\eta}\lambda\omega\nu$ ). In this section we will examine indefinite pronouns (someone/something) and interrogative pronouns (who? which? what?).

### **Possessive Adjectives**

Possessive adjectives are used in place of the genitive case of the personal pronouns at times.

```
έμός -- my

σός -- your

ἡμετερος -- our

ὑμετερος -- your (pl.)

Εχαmple:

ἀγίασον αὐτοὺς ἐν τῆ ἀληθείᾳ ὁ λόγος ὁ σὸς ἀληθειά ἐστιν (Jn. 17:17)
```

# sanctify them in the truth, your word is truth

# Indefinite Pronouns (τις/τι, someone, anything)

This form is an enclitic and is often combined with  $\delta \varsigma$  ( $\delta \sigma \tau \iota \varsigma$ ).

	Singular		Plural	
	Masc. and Fem.	Neut.	Masc. and Fem	Neut.
Nom.	TIS	τι	απα Γεπ τινές	τινά
Gen.	τινός	τινός	τινῶν	τινῶν
Dat.	τινί	τινί	τι $\sigma$ ί(ν)	τισί(ν)
Acc.	τινά	Τl	τινάς	τινά

Note that the word is an enclitic, with no accent of its own. These forms receive an accent when given special emphasis or when beginning a clause. The two-syllable forms also receive an accent when following a word with no accent on the ultima.

#### Example:

Καὶ ἀποστέλλουσιν πρὸς αὐτόν τινας τῶν Φαρισαίων.

And they sent to him some of the Pharisees (Mk. 12:13).

We have looked at interrogative clauses, which use  $o\vec{\upsilon}$  when expecting an affirmative answer and  $\mu\acute{\eta}$  when calling for a negative one. Other questions may also be introduced by the following interrogative adverbs:

```
    πότε when?
    ποῦ where?
    πῶς how?
    τίς, τί who? which? what?
```

#### Other interrogatives are

διὰ τί why? τί why?

### Interrogative Pronoun ( $\tau i\varsigma/\tau i$ who? which? what?)

	Singular		Plural	
	Masc.	Neut.	Masc.	Neut.
	and Fem	•	and Fem	•
Nom.	τίς	τί	τίνες	τίνα
Gen.	τίνος	τίνος	τίνων	τίνων
Dat.	τίνι	τίνι	τίσι(ν)	τίσι(ν)
Acc.	τίνα	τί	τίνας	τίνα

Note that these forms are not enclitic; instead, they have their own accent. Note also that the two-syllable forms are accented on the first syllable and that the acute accent on  $\tau i\varsigma$  and  $\tau i$  never changes to a grave accent. The accent is the only difference in form from the indefinite pronoun  $\tau i\varsigma/\tau i$ , which is enclitic.

Example:

μὴ οὖν μεριμνήσητε (worry) λέγοντες Τί φάγωμεν; ἤ Τί πίωμεν; ἤ Τί περιβαλώμεθα (wear)(Mat. 6:31).

Therefore do not worry saying, "What shall we eat?" or "What shall we drink?" or "What shall we wear?"

#### **Greek Numbers**

There are two types of numbers:

- 1. Cardinal numbers (1, 2, 3 and counting)
- 2. Ordinal numbers (first, second, and third, telling order in a list)

In Greek ordinal numbers are expressed as shown:

πρῶτος, -η, -ον	first
δεύτερος, -α, -ον	second
τρίτος, -η, -ον	third
τέταρτος, -η, -ον	fourth

#### **Cardinal Numbers**

Cardinal Numbers function like adjectives:

εἷς, μία, ἕν	1	<b>έ</b> ξ	6
δύο	2	έπτά	7
τρεῖς, τρεῖς, τρία	3	ὀκτώ	8
τέσσαρες, -ων	4	ἐννέα	9
πέντε	5	δέκα	10
		$\epsilon$ ίκο $\sigma$ ι	20
		τριάκοντα	30
έκατόν	100	τε <i>σσ</i> εράκοντα	40
χίλιοι, -αι, -α	1,000	πεντήκοντα	50

#### **Teens**

<b>έ</b> νδεκα	δώδεκα	τρισκαίδεκα	δεκατέ <i>σσ</i> αρες	δεκαπέντε
11	12	13	14	15

#### **Tens**

ͼἵκοσι	τριάκοντα	τεσσαράκοντα	πεντήκοντα	έξήκοντα
20	30	40	50	60

#### **Number One**

The number one is often compounded ( $o\dot{\upsilon}\delta\epsilon\dot{\iota}\varsigma$ ,  $\mu\eta\delta\epsilon\dot{\iota}\varsigma$  no one, nothing) and you should be able to recognize how it is declined (Machen, *New Testament Greek*, 165; Summers, *Essentials*, 138):

	Masc.	Fem.	Neut.
Nom.	််းဌ	μία	<b>έ</b> ν
Gen.	ένός	μιᾶς	ένός
Dat.	ένί	μιᾳ	ένί
Acc.	<b>έ</b> να	μίαν	<b>έ</b> ν

#### **Example**

ἦσαν δὲ ἐκεῖ λίθιναι ὑδρίαι ἕξ κατὰ τὸν καθαρισμὸν τῶν Ἰουδαίων κείμεναι, χωροῦσαι (holding) ἀνὰ μετρητὰς δύο ἢ τρεῖς (Jn. 2:6)

But there was lying there six stone water jars according to the purification of the Jews, holding two or three measures each

#### Chant Numbers: 1-10, 12, 100, 1000

```
εἷς, δύο, τρεῖς, τέσσαρες, πέντε, 
ἕξ, ἑπτά, ὀκτώ, ἐννέα, δέκα,
δώδεκα, ἑκατόν, χίλιοι
```

## Vocabulary

έαυτοῦ, -ῆς	of him/her/itself (319)
έμός, -ή, -όν	my, mine (76)
ίμάτιον, -ου, τό	garment (60)
νύξ, νυκτός, ή	night (61)
δστις, ήτις, δτι	whoever (153)
ποῦ	where? (48)
προσκυνέω	I worship (60)
τις, τι	someone, something (525)
τίς, τί	who? which? what? (555)
ယ်δε	here, hither (61)
